Objective

Seeking a rewarding position in a company that values my technical skills and passion for creating user-friendly websites, being committed to continuous learning and growth for mutual success.

Skills

Programming Languages: JavaScript, TypeScript, Python

Frameworks: Chakra UI, Tailwind, Bootstrap, Material UI, React Router

Technologies: React, MongoDB, Firebase, Redux, Express, Vite, Axios, TanStack Query, HTML5, CSS3

Tools: Node JS, Figma, Chrome DevTools, Git, VS Code, React DevTools, CodePen

Projects

EduToys | Live Link   GithubClient   GithubServer

Discover and explore a vibrant Educational and Learning Toys website with a colorful user interface. Select from a wide range of toys categorized within sorted tabs.

Features:
- Seller can securely authenticate and get access to add toys to their profile.
- Authenticated users can effortlessly update and delete the toys they have added.
- Sorted tabs provides users to easily navigate toys based on their preferred categories.

Technologies: Tailwind, Vite, Firebase, MongoDB, Express, React Router

Nippon Resutoran | Live Link   GithubClient   GithubServer

Japanese cuisine-based site featuring skilled chefs showcasing their famous recipes. Signing in is required to access chef recipes, ensuring a secure and personalized culinary journey.

Features:
- Access to chef recipes allowed to authenticated users only, ensuring secure browsing.
- Users can add their own collection of favorite recipes by adding to favorites list.
- Enjoy the flexibility of authenticating with either email, Google, or GitHub.

Technologies: ChakraUI, Vite, Firebase, MongoDB, Express

Lingos | Live Link   GithubClient   GithubServer

Lingos is an educational tech platform delivering quality language learning worldwide through a beautiful user interface. It offers top classes, secure access control, instructor collaboration, seamless payment integration, and automated seat management for an optimal learning experience.

Features:
- Lingos features landing page highlighting top classes and instructors
- Instructors can create and submit classes for review and publication by the admin
- Stripe integration enables students to make secure payments for language classes.

Technologies: Vite, Local Storage, TailwindCSS, React Router, Firebase, MongoDB
